# GIS Services

Parikh Info Solutions Pvt. Ltd.

About Us

Established in 1998, Parikh Info Solutions Pvt. Ltd. has earned a reputed position in the market. For all your IT-enabled needs we are a trusted solution. We are an esteemed service provider of 2D/3D CAD, CAM, Architectural modelling, Geographic Information System, Language Translation, Localization, Subtitling, transcription, VO and Dubbing Services for all Indian languages.

We have over 20 years of rich experience in the field of Designing, Translation and Geospatial Services. Our headquarters are in Mumbai, India and we provide services all over the globe. We have a local as well as globally satisfied clientele. Our highly trained team maintains the global code of standards to deliver accurate and reliable service.

Our Esteemed Clients

DIGITAL MAPPING SERVICE

PISPL has the expertise in providing Digital Mapping services and solutions using various geospatial software and techniques. Through conversion (vectorization or digitization), migration, maintenance and mapping services, we provide our customers, high-quality Geospatial data. Our company can manage small or large, simple or complex, partial or entire GIS mapping projects for several industries worldwide. They include multi-year conversion, migration and maintenance contracts for GIS mapping and Geodatabase. We cover the entire range of services like scanning, image processing, vectorizing, QA/QC, plotting etc. for any kind of digital mapping projects including but not limited to: Contour Mapping, Weather Mapping, Agriculture Mapping, Airport Database Mapping.
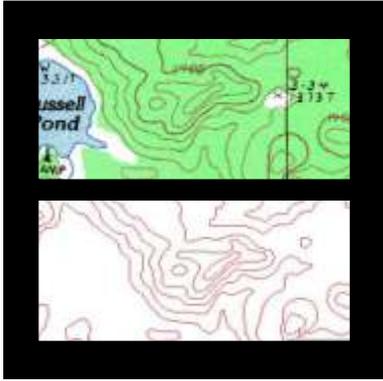

UTILITIES MAPPING SERVICE

PISPL specializes in Automated Mapping / Facilities Management Systems (AM/FM) and Geographic Information Systems (GIS) for utility mapping projects worldwide. We offer these services to various utilities like Gas, Sewer, Water, Telecommunication. Our highly trained professionals have the knowledge to blend the technologies of digital mapping from variety of sources including satellite images, aerial, photographs, GPS field data, existing maps and underground survey data leading to GIS database creation. We can also manage to update existing AM/FM/GIS data with the modified network and components of utilities. A small team can be reserved for continuous update of existing data on a daily basis.

AUTOMATED GIS CONVERSION SERVICE

We have the technology to perform fully automatic vectorization and interactive line tracing from scanned maps and drawings. The output can be further edited to required specifications. This automated process helps us save large costs of manual vectorization and reduce any manual errors. Our automated technology enables us to provide you the best quality. We provide raster to vector conversion and map digitizing services using this automated conversion technology. We have highly competitive rates and transparent work structure to serve you better.

LOCATION BASED SOLUTIONS

Location Survey, Data Collection and Digital Maps has become the base for all types of Network and Route Planning, essential for various organizations. We undertake Comprehensive Surveys to map accurate location of any site in the most remote areas and collect attribute data. This data is processed to prepare digital data which is made a part of digital maps making them intelligent. Competition Data, Demographic Data, Traffic Data and other important data is appropriately merged to create a comprehensive database. This database can be used for Spatial Gap Analysis, Asset Management, Logistics and Transportation, Franchise Outlets, Strategic Network Planning, Standardized reports.

REMOTE SENSING SERVICE

Remote sensing is the acquisition of information about an object or phenomenon, without making physical contact with the object. We have state of the art technology to work on various remote sensing images including:

- LIDAR data
- Satellite imagery
- Orthophotos
- Stereo pairs of Aerial Photographs

The data collected using the above methods has several applications in fields like agriculture, natural resource planning, disaster management, Urban and Highway Planning, Oil and Gas Distribution Planning etc. We have a highly trained staff to cater all your Mapping needs. Enjoy highest quality now at very competitive rates with our remote sensing services.

INTERNET GIS SERVICES

At Parikh Info Solutions Pvt. Ltd. we provide highest quality GIS services. We provide the latest technology to launch your maps as a website. We have a highly trained team to serve all your GIS needs such as, Creating the maps (with or without database), designing a website with selective map and database layers to display, zoom, advanced find/search etc. along with hosting on a map server, etc. We also provide custom 'map' related website code and tools.

DIGITAL PHOTOGRAMMETRY SERVICE

We at Parikh Info Solution Pvt. Ltd. provide digital photogrammetry solutions to all kinds of clients with services like:

- Aerial Triangulation
- Mosaicking
- DSM
- DEM / DTM
- Colour Balancing
- Feature Collection
- 3D Model generation
- LIDAR Data Processing

3D GIS MODELLING SERVICE

PISPL has the widest technology platform and a huge knowledge base to serve your modelling needs. Geographical 3D Modelling can be a tedious task. We have the capabilities to create 3D-City and Urban information models. We have the technology platform to create complex, real-time virtual city and landscape models. and offer new solutions for the presentation, analysis, editing and documentation of geo-information. Our latest technology enables us to automatically create as well as update complex 3D city models. Furthermore, these virtual city models can be seamlessly integrated into standard GIS environments. The city models can be linked to databases containing other meta information for uses such as facility management and urban data mining for real-timevisualization and analysis.
